

## FACT SHEET

As of December 31, 2024

AerCap Materials is the leading distributor of airframe and engines material for commercial aircraft and engine manufacturers. We provide spares distribution, financing and leasing solutions, supply chain management solutions, and dismantling expertise to more than 850 customers globally. AerCap Materials' facility is Aircraft Fleet Recycling Association (AFRA) accredited and is ISO and ASA-100 certified. With more than five decades of aftermarket experience and one of the largest inventories, AerCap Materials has the experience, expertise and solutions tailored to meet customer supply chain requirements, around the clock and around the world.

### Products & Services

- **Spares Distribution** - Provide access to high-quality spare components for a wide range of airframes and engines.
- **Financing & Leasing** - Conserve capital and retain operational control of inventory.
- **Repair Management** - Leverage our supply base and infrastructure to achieve improved turn times and reduction in repair spend.
- **Acquisitions** - Monetize aircraft, engines or inventory through acquisition or consignment.
- **Dismantling** - Design tailored worksopes with competitive pricing and accelerated turnaround time.
- **Engine Modules** - Various Modules available across engine types for sale or exchange.

### Web Portal Access

Search AerCap Materials' inventory using our web portal. Browse inventory, view paperwork, or request a quote. Our extensive inventory is accessible from anywhere.
